CREATING A DESTINATION

CHILMINGTON WILL HAVE A UNIQUE CHARACTER AND IDENTITY.

This will be defined by its landscape setting, relationship to the wider countryside, its distinctive network of streets, walkable neighbourhoods and open spaces, as well as how these are inhabited. The residents at Chilmington will benefit from over £125m worth of new facilities, specifically for Chilmington.

Chilmington will have its own attractive and bustling high street with a great choice of shops, a supermarket, restaurants, business and commercial premises, leisure facilities and a community hub that will offer a broad range of services for the residents of Chilmington. There will also be four primary schools, a secondary school and further recreational and leisure facilities, creating a vibrant community that feels truly connected.

There will be an abundance of landscaped green spaces, including a 300-acre country park with sports pitches, pavilions and event facilities, allowing the community

to enjoy parkland and nature, relax with the family, and, most importantly, feel a sense of belonging. Of course, the other advantage of choosing Chilmington as your new home is the excellent transport connections. High-speed rail links will get you to London St. Pancras from Ashford International in just 38 minutes, while the A28 and M20 motorway will provide direct routes to Ashford and beyond.

Chilmington has been created with the best of town and country living in mind. And when you choose it as your new home, you can be certain you and your family will be able to live, work and thrive.

EDUCATION

TAKEN CARE OF

Providing education facilities is one of the key elements in the creation of Chilmington. And we believe with a new secondary school and four primary schools your children's education will be taken care of.

Chilmington's first primary school, opening at Chilmington in 2020, will provide education for 420 pupils and will boast state-of-the-art facilities right in the heart of this new community. Chilmington Green Primary School is a member of The Stour Academy Trust. This leading primary-only, Multi-Academy Trust has schools across Kent with a proven track record of providing outstanding outcomes for children, and is rated as 'Outstanding' by Ofsted.

Students from Chilmington will be welcomed to the primary schools, while the secondary school will serve both Chilmington and the wider Ashford community.

Whichever school your children attend, they will be able to enjoy brand new facilities in modern, sustainable buildings.

CREATING A PLACE

FOR EVERYONE

Chilmington is a vital part of the plan to take Ashford further. And with £125m of new state-of-the-art facilities now being built at Chilmington by Hodson Developments, the vision of this new Garden City can be realised.

As well as our collection of brand new homes, shops, schools, commercial, leisure and healthcare facilities will all be created. Whilst the creation of these services will be a clear benefit to residents and visitors alike, they will also help to generate more than 1,000 new jobs over and above the construction roles, all of which will involve a simple walk or cycle ride from home.

BUILDING HOMES

AND CREATING SUSTAINABLE PLACES

AT HODSON DEVELOPMENTS WE ARE PROUD TO BUILD
WHAT YOU CHERISH MOST OF ALL. HOME.

We're about doing things that actually make a difference in your life and the community that we build in. We create, design and build award winning new homes and vibrant neighbourhoods in prime locations that set new benchmarks in living, whilst protecting and enhancing biodiversity and natural habitats.

Green living and sustainable developments are central to our agenda. We are committed to reducing energy use in the homes that we build, helping improve energy savings and reducing your utility bills. We do this by working with world leading companies in conserving energy, such as Google Nest (owned by Google).

Creating a sustainable living environment that is also called home is central to the ethos of Chilmington Lakes and the wider Chilmington development.

The entire development was conceived with sustainability in mind – from building design to community and biodiversity.

The homes at Chilmington Lakes all have easy to use smart thermostats by Google Nest, energy efficient appliances, enhanced thermal insulation of walls, roofs and floors and energy efficient lighting.

Away from the homes the meadows and parklands will be established with native plant species, creating spaces that boost biodiversity and allow for communities to blossom. Cycle paths and walkways will make getting around healthy, hassle free and with a low impact on the environment.

At Hodson Developments, our driving aim is to create exceptional sustainable places for people to live, work, and relax in, and establish communities that will thrive today and for years to come.
